Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint 1	Registration	USN-1	As an biogeography, I can register for the application by entering my Email,Password, and confirming my password	2	High	Deepan S Abishek M Deenadhyalan Karthikselvan
Sprint 1	User Confirmation	USN-2	As an biogeography, I will receive confirmation email once I have registered for the application	1	Medium	Deepan S Abishek M Deenadhyalan Karthikselvan
Sprint 1	Login	USN-3	As an biogeography, I can log into the application by entering email & password	2	High	Deepan S Abishek M Deenadhyalan Karthikselvan

Sprint 2	Data Collection	USN-1	Download the dataset used in Digital Naturalist – AI Enabled tools for Biodiversity Researchers	2	High	Deepan S Abishek M Deenadhyan Karthikselvan
Sprint 2	Image Preprocessing	USN-1	Improving the image data that suppresses unwilling distortions or enhances some image features important for further processing, although performing some geometric transformations of images like rotation, scaling, etc.	1	High	Deepan S Abishek M Deenadhyan Karthikselvan
Sprint 3	Getting started with Convolutional Neural Network	USN-1	Neural network are integral for teaching computers to think and learn by classifying information, similar to how we as humans learn. With neural networks, the software can learn to recognize images, for example. Machines can also make predictions and decisions with a high level of accuracy based on data inputs.	2	High	Deepan S Abishek M Deenadhyan Karthikselvan
Sprint 3	Evaluation and model saving	USN-1	well a model behaves after each iteration of optimization. An accuracy metric is used to measure the algorithm's performance in an interpretable way. The accuracy of a model is usually	1	Medium	Deepan S Abishek M Deenadhyan Karthikselvan

			determined after the model parameters and is calculated in the form of a percentage. Saving The Model get weights , set weights .			
Sprint 4	Application Building	USN-2	After the model is built, we will be integrating it to a web application so that normal users can also use it. The users need to give the images of species	1	High	Deepan S Abishek M Deenadhylan Karthikselvan
Sprint 4	Train the Model on IBM	USN-2	Build Deep learning model and computer vision Using the IBM cloud.	2	High	Deepan S Abishek M Deenadhylan Karthikselvan
